

# EAML 58 B / C - 63 A / D / E **ANALOGUE**

**SOLID SHAFT MULTITURN ABSOLUTE ENCODER** 

#### MAIN FEATURES

Industry standard multiturn absolute encoder for factory automation applications.

- · Optical sensor technology (OptoASIC + Energy Harvesting)
- · Programmable measuring range via teach-in function (inputs or cover button)
- · Power supply up to +30 VDC with analogue (voltage or current) as electrical interface
- · Cable or M12 connector output
- · Solid shaft diameter up to 10 mm
- · Mounting by synchronous, clamping or centering 2,5" square flange

ELECTRICAL SPECIFICATIONS					
Multiturn resolution	16 bit max				
Singleturn resolution	16 bit max				
Output DAC resolution	16 bit				
Minimum angle	22,5°				
Linearity error	± 250 arc-sec				
<b>Power supply</b> +11,4 +30 V DC (reverse polarity protection)					
Power draw without load	< 1 W				
Output type	voltage (0 5 V / 0 10 V) current (0 20 mA / 4 20 mA)				
Auxiliary inputs (BEGIN - END - U/D)	active high (+Vdc) connect to 0V if not used / t <sub>min</sub> 150 ms				
Load	$R_{min}$ = 1 k $\Omega$ (voltage output) $R_{max}$ = (V <sub>DC</sub> <sup>-</sup> 2) / 0,02 (current output)				
Output update frequency	16 kHz				
Signal pattern	auto teaching according to commissioning				
Start-up time	150 ms				
Electromagnetic compatibility					
RoHS	according to 2011/65/EU directive				
UL / CSA	certificate n. E212495				

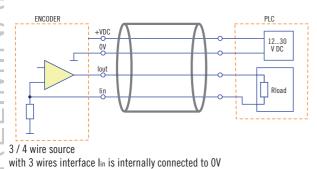

MECHANICAL SPECIFICATIONS				
Shaft diameter	ø 6 / 9,52 (3/8") / 10 mm			
Enclosure rating IEC 60529	X = IP 65 shaft side / IP67 cover side $S = IP 67$			
Max rotation speed	see below table			
Max shaft load	80 N radial / 40 N axial (TBD)			
Shock	50 G, 11 ms (IEC 60068-2-27)			
Vibration	10 G, 10 2000 Hz (IEC 60068-2-6)			
Moment of inertia	1,5 x 10 <sup>-6</sup> kgm <sup>2</sup> (36 x 10 <sup>-6</sup> lbft <sup>2</sup> )			
Starting torque (at +20°C / +68°F)	< 0,03 Nm (4,25 Ozin)			
Bearing stage material	EN-AW 2011 aluminum			
Shaft material	1.4305 / AISI 303 stainless steel			
Housing material	painted aluminium / mild steel			
Bearings	2 ball bearings			
Bearings life	10 <sup>9</sup> revolutions			
Operating temperature	-20° +85°C (-4 +185°F)			
Storage temperature	-20° +85°C (-4 +185°F)			
Weight	approx 350 g (12,35 oz)			

## **ELECTRICAL INTERFACE**

Voltage output

Current output

ROTATION SPEED / TEMPERATURE TABLE				
Temperature °C (°F)	Max speed (rpm)	Max continuous speed (rpm)		
up to +70 (+158)	10000	8000		
+70 +85 (+158 +185)	8000	5000

### **TEACH IN PROCEDURE**

Teach-in procedure with SET button

- · press SET button (at least 3 sec) -> the encoder enters into teach in procedure (led B (GREEN) / led A (RED) on)
- · keep pressed SET button (at least 3 more sec, 6 sec total) -> teach in procedure confirmed (led B (GREEN) / led A (RED) flashing 2 Hz frequency), 1 min timeout
- · rotate the encoder shaft to initial position
- · press SET button -> initial position set (led B (GREEN) on / led A (RED) flashing), 10 min timeout
- · rotate the encoder shaft to end position
- · press SET button -> end position set (led B (GREEN) / led A (RED) flashing 4 times (1,5 Hz frequency))
- · led B (GREEN) on -> user parameters set

To reset to factory default (15 turns) press SET button at least 10 seconds (led B (GREEN) / led A (RED) alternate flashing) -> led A (RED) on

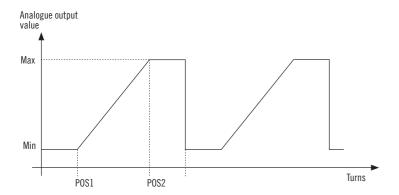

Teach-in procedure with BEGIN/END inputs

- · rotate the encoder shaft to start position
- set BEGIN input on high level (pulse) -> led B (GREEN) on / led A (RED) flashing (10 min timeout)
- · rotate the encoder shaft to end position
- · set END input on high level (pulse) -> end position set (led B (GREEN) and led A (RED) flashing 4 times (frequency 1,5 Hz))
- · led B (GREEN) on -> user parameter set

To reset to factory default (15 turns) set BEGIN / END inputs on high level simultaneously (led B (GREEN) / led A (RED) alternate flashing) -> led A (RED) on

#### **OVERRUN**

Overrun values outside programmed travel POS1 and POS2 are equally splitted respect minimum and maximum output value with approximation to the next integer.

#### LED INDICATION

The leds on the encoder cover are useful to understand operating status of the product as show on below table:

Led A (RED)	Led B (GREEN)	Meaning		
on	off	normale operation default parameters		
off	on	normal operation user parameters		
on	on	entering teach-in		
flashing	flashing	teach-in confirmed frequency 2 Hz		
flashing	on	encoder start position set, wait for end position		
flashing	flashing	SET button pressed for at least 10 sec, reset to factory default alternate flashing
