

BCIC-3312

Raysulate distribution insulator bird protection cap (5–25 kV)

Designed to protect birds and animals from live conductors and insulator tops, the BCIC-3312-03 is a vacuum formed part. BCIC-3312 includes extension arms to allow it to conform to bent conductors from single or double insulators.

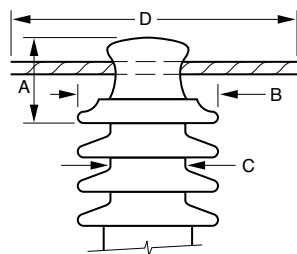

Installation is simple and requires no tools, yet the assembly is securely fixed to withstand harsh environments.

BCIC-3312 kit contains:

- 1 bird protection cap
- 2 short closure channels
- 2 extension pieces
- 2 long closure channels
- 2 plastic rivets

BCIC-3312-03 kit contains:

- 1 bird protection cap
- 2 short closure channels

Selection information (dimensions in inches/millimeters)

Catalog number	A (min.–max.)	B (min.–max.)	C (min.–max.)	D area protected
BCIC-3312	2.4–5.1 (60–130)	5.1–7.5 (130–190)	2.0–3.9 (50–100)	78.7 (2000)
BCIC-3312-03	2.4–5.1 (60–130)	5.1–7.5 (130–190)	2.0–3.9 (50–100)	26.8 (680)
