■ ■ ■ Dal 1970 la ventilazione made in Italy

EXPORT CATALOGUE

AS CLEAR AS AIR

The indoor air quality is essential to ensuring good quality of life.
We passionately work with the objective of manufacturing not simply fans,
but innovative, technologically advanced and human health focused products:
ours is a real future orientated commitment.

■ ■ ■ Dal 1970 la ventilazione made in Italy

AN ITALIAN TRADEMARK IN THE WORLD

Elicent products are distributed in 70 countries worldwide. In over 40 years of fervent activity, we have become firmly convinced that our success is closely connected to our capability of building up a team based on human values and on a strong relationship with our business partners founded on mutual respect.

SONAR

OUR ENGAGEMENT IS YOUR ASSURANCE

Our products are IMQ approved and the UNI EN ISO 9001: 2000 Certification ensures that the quality system is studied to meet the highest satisfaction levels of our customers. Besides, the whole production is subject to a severe computerized quality control system during assembly called SONAR, which certifies that fans are 100% individually tested.

GUIDELINES FOR A CORRECT VENTILATION

Selecting the correct fan

Extraction is always made from humid/polluted premises:
kitchens, laundries, toilets, bathrooms, bars... To choose the fan airflow needed for a specific application, use the following calculation:

$$\text{Airflow} = \text{volume of the room in m}^3 \times \text{number of air changes per hour}$$

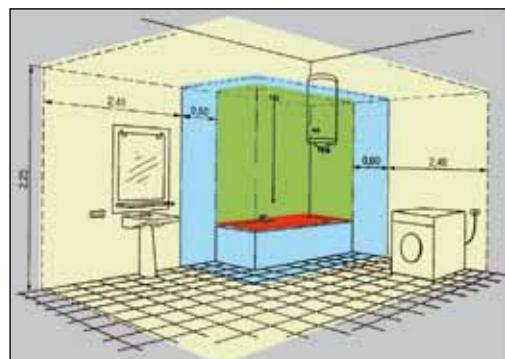

Type of room	Air change per hour
Kitchens	6 - 10
Bathrooms and shower rooms	8 - 12
Toilets	8 - 10
Public toilets	10 - 15
Restaurants and bars	10 - 12

Setting the fan correctly

- Fans should always be mounted in the furthest window, wall or ceiling from the main source of air replacement to ensure airflow across the room and avoiding short circuiting of air movement.
- Air replacement should be ensured via internal grilles in the door, ceiling or wall.
- Fans should be located as high as possible in the window or wall nearest to smells or streams but not directly above eye-level grilles or cooker hoods.

- If installing in a bathroom, the fan must be located where it cannot be touched by a person. Elicent range of 12 Volt SELV fans (Safety Extra Low Voltage) can be installed in zone 1.
Fans with IPX4 protection can be installed in zone 2.
Fans with an IPX2 protection must be installed in zone 3.

Choosing the right Elicent fan

Axial Fans	Centrifugal fans	Centrifugal in-line fans
Axial fans are designed to extract large volumes of low pressure air directly to the outside and over short distances (max. duct length 3 m). Suitable for wall, window, duct and ceiling application.	Centrifugal fans are designed to extract air over long distances and to overcome the resistance of long length and curved ducting. Suitable for wall, ceiling, roof (MRF) application.	Centrifugal in-line fans have a powerful centrifugal impeller and their special shaped housing allows the air to be drawn over its axis (inline). Suitable for duct installation.
Elicent wall axial fans: Elegance - E-Smile - E-Style - Ecoline Muro - Ministyle - Built-in Elicent window axial fans: Vitro - Minivitro - Ecowind	Elicent centrifugal fans: Elix - Elprex - Radia - Flux - Chef - Tirafumo - EXT - MRF	Elicent centrifugal in-line range: AXC - AXCTP - AXM

Operation

STANDARD version
Light/remote control switch.

PULL CORD switch

TIMER
Integral electronic timer adjustable from 3 to 25 minutes.

COMFORTIMER
Microchip Timer version adjustable from 3 to 25 mn with overrunning at low speed for an energy saving up to 64% compared to a standard timer version. The low speed guarantees increased silence and energy saving though maintaining a fully satisfying exhausting efficiency. Version particularly suitable for hotels, hospitals, private homes and for all those applications where silence is a must.

MHT humidity control
Integral humidity control adjustable from 40 to 80% of R.H.

MHY Smart humidity control
Provided with the latest microchip technology.
Operation: automatic and progressive increase / decrease of the motor speed according to the percentage of R.H.

COMFORT HYGRO
Combines to Comfortimer technology a microchip humidity sensor adjustable from 40 to 80% of R.H.

P.I.R.
Passive infra-red sensor with integral adjustable timer from 3 to 25 minutes.

12 VOLT
Low voltage version.

2 V
Double speed version (24 hours running at the lowest speed).

EC MOTOR
High efficiency, electronically controlled, brushless motor.

Product Specification

INSTALLATION

Direct exhaust to the outside

Ducted installation

CERTIFICATIONS

IMQ approved

Product compliance with EC Directive

PROTECTION

Double insulation - Class II earth connection not required

International Protection rating

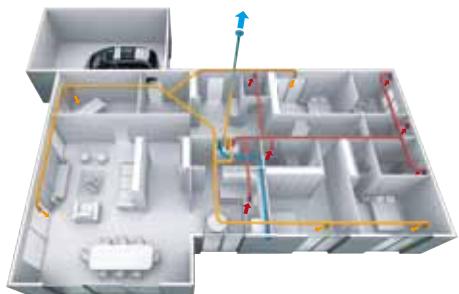

Splash proof protection (EN 60335-2-80)

Drop protection (EN 60335-2-80)

Maximum operating temperature

ENERGY EFFICIENT ELICENT HOME SYSTEMS

Whole house mechanical ventilation with heat recovery

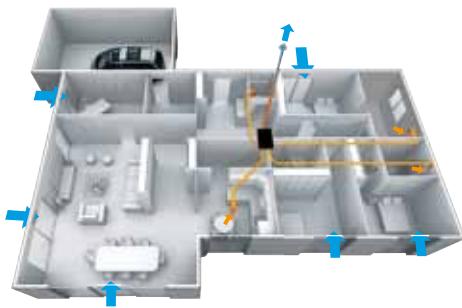

High efficiency central heat recovery solutions for air intake/extract: the hot internal air extracted from the premises goes through a heat exchanger before being expelled outside. The fresh air coming from outside is first filtered and then goes through the exchanger where it recuperates up to **93%** of the heat released by the extracted air.

- High energy and thermal efficiency thanks to EC motors and high performance heat exchangers
- Air quality and humidity control 24 hours
- Maximum comfort

Whole house mechanical extract ventilation

High efficiency central ventilation solutions for air extract: the stale air is exhausted from humid rooms (kitchen, bathroom, toilets, laundry). The fresh air is supplied by specific air entrance points.

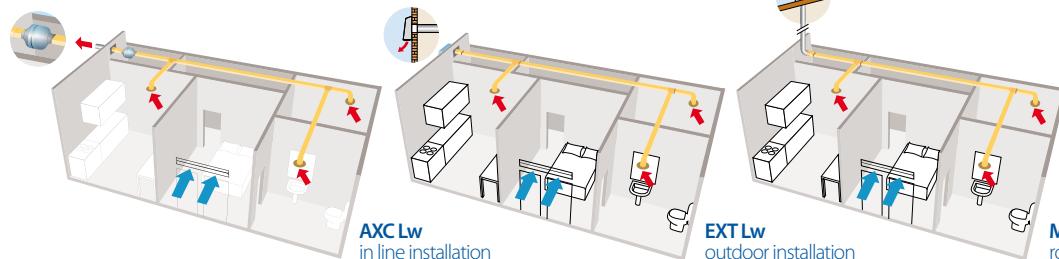

- High energy efficiency with EC motors.
- Designed for ease of installation and low noise running

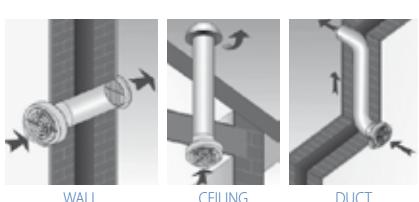

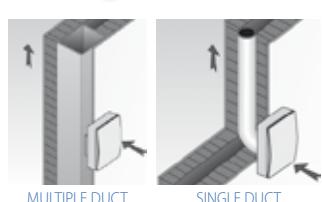

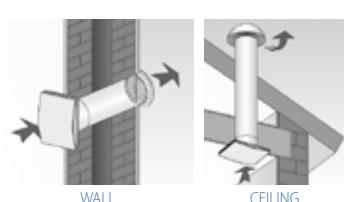

All models available with EC motors.

Centralised mechanical ventilation - Low watt fans

Powerful low watt centrifugal fans for in line, outdoor or roof application. Ideal and cost-effective solution as small size centralised ventilation system in residential and commercial areas.

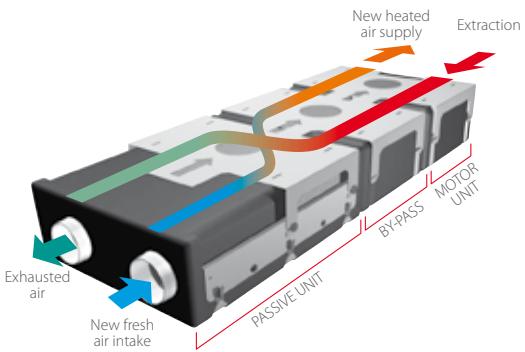

Decentralised mechanical ventilation - Design and Performance

AERA IN LINE

living areas up to 120 m²

- High energy saving thanks to EC motors
- High efficiency heat recovery up to **91%** BRE tested according to EN308
- Compact and modular
- IPX2
- G4 filters (F7 option)

VERSIONS

AERA in line

Provided with external rotor motor and forward blade impeller 2 speed running: continuous running at the minimum speed, maximum speed is activated through remote control.

AERA in line EC

Provided with brushless motor for an optimal combination between high performance, silence and low energy consumption.

SUPPLIED

RLS 1 WR

Remote speed controller for AERA EC. Provided with warning led for filter cleaning/replacement

ACCESSORY

RLS AC

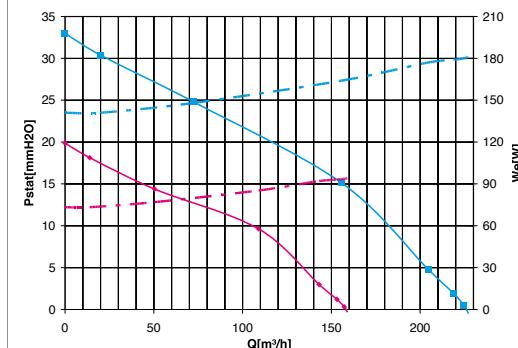

Remote speed control (min-max) and On/Off switch for AERA (no EC version).

CURVE

- High extract performance for polluted premises, ideal for commercial environments.
- Suitable for wall, double window and double glazed window installation (accessories upon request).
- 9" and 12" (automatic versions) are suitable for reverse running.

VERSIONS

- M** Manual version (pull cord switch)
- A** Automatic electrical opening of the shutter. ON/OFF via light/remote switch
- AR Automatic Reversible**
Automatic electrical opening of the shutter. ON/OFF via light/remote switch. + Reversible air flow through reversible speed controller RS/R, RVS/R or RVS/R (see page 29).
- P** Potentiated motor for higher air flow performance

- Automatically activates when hand piece is removed from the base.
- Fitted with a special security system which switches off the dryer after 15 min of use.
- High velocity airflow (79 Km/h) for a quick drying.
- White ABS plastic one-piece cover, 3 mm thick, impact-resistant and UV protected.

TECHNICAL SPECIFICATIONS

Airflow (m³/h)	40
RPM	15.000
Air velocity (Km/h)	79
Air temperature	60°C
Motor Power (W)	150
Heating element power (W)	700
Consumption (A)	3
Noise level (dBA)	60
Voltage (V)	220-240
Frequency (Hz)	50/60
Length tube (mm)	800 - 2000 mm
Weight Kg	1,8 Kg
Electrical insulation	Classe II - <input checked="" type="checkbox"/>
Protection	IP23

POLAR

- Speed controllable with RVS/RL or RVS/R Plus (regulation of 4 Polar). See page 29.

ACCESSORIES

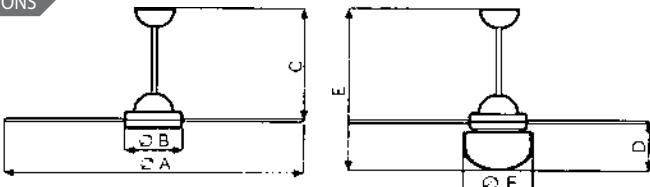

- Receiver
- Remote controller
- Light kit
- Shafts of 30 or 90 cm (43 cm supplied as standard)

VENTILATION Reversible ceiling fan

MODEL	DIAMETER (mm)	W	RPM	m³/h

R10 series

CE

SENSORS

R10 TIMER - Remote timer

- **Electronic timer, adjustable from 3 to 25 minutes**
- The fan to which it is connected will overrun after switch-off for the pre-set time.
- Time adjustment via external knob
- ON/OFF light switch
- New design with protection cover
- Suitable for surface and built-in installation
- Ease of connection by means of removable terminals
- Preset holes for surface or recessed cable entry
- **Max load 4 A**
- Single-phase 117-230V / 50-60 Hz
- Class II protection, no earth connection is needed
- **Provided with protection fuse**
- Weight: 0,5 Kg
- Dimensions 110x80x42 mm

R10 HY - Remote Humidity Sensor

- The sensor **automatically** switches ON/OFF the fan according to the detected level of relative humidity, **adjustable from 40 to 90%**.
- The permanent control of the humidity level offers important advantages: maximum comfort for the user and energy saving as the fan is activated only if necessary.
- Suitable for surface and built-in installation
- Ease of connection by the means of removable terminals
- Preset holes for surface or recessed cable entry
- **Max load 4 A**
- Single-phase 117-230V / 50-60 Hz
- Class II protection, no earth connection is needed
- **Provided with protection fuse**
- Weight: 0,5 Kg
- Dimensions 110x80x42 mm

R10 P.I.R - Remote Passive Infrared Sensor

- The fan goes on any time the sensor detects a human presence in the room
- **Provided with integral delay timer adjustable from 3 to 25 minutes**, which keeps the fan running for the pre-set period after the room is vacated
- **Ideal solution for public toilets**
- The green led indicates that the sensor is detecting
- Suitable for surface and built-in installation
- Ease of connection by means of removable terminals
- Preset holes for surface or recessed cable entry
- **Max load 4 A**
- Single-phase 230V / 50-60 Hz (different voltage upon request)
- Class II protection, no earth connection is needed
- **Provided with protection fuse**
- Weight: 0,5 Kg
- Dimensions 110x80x42 mm

R10 AQS - Remote Air Quality Sensor

- The sensor reacts to tobacco smoke and unpleasant odours
- **It automatically switches the fan ON/OFF according to the detected air quality level, manually adjustable.**
- Suitable for surface and built-in installation
- The permanent control of indoor air quality offers important advantages: maximum comfort for the user and energy saving as the fan is activated only if necessary.
- **Ideal for public premises**
- Ease of connection by the means of removable terminals
- Preset holes for surface or recessed cable entry
- **Max load 4 A**
- Single-phase 117-230V / 50-60 Hz
- Class II protection, no earth connection is needed
- **Provided with protection fuse**
- Weight: 0,5 Kg
- Dimensions 110x80x42 mm

ELECTRONIC CONTROLLERS CE

SPEED CONTROLLERS

RV1

- Electronic speed controller
- Infinitely variable speed control by potentiometer.
- ON/OFF switch
- IP42 protection
- **Max. load: 800 W (4A)**
- **Min. load: 400 W (1A)**
- Supply voltage: 230V-50 / 60 Hz
- Sizes: 110x100x58 mm
- Weight: 0,5 kg

R10

- Infinitely variable electronic speed controller by potentiometer
- New design with cover
- **Suitable for surface and built-in application**
- Ease of connection by the means of removable terminals
- External trimmer for the adjustment of the fan minimum speed
- Protection fuse
- Preset holes for surface and recessed cable entry
- Single-phase 230V – 50 Hz
- **Max. load 1A**
- Protection IP42
- Weight 0,5 Kg
- Dimensions 110x80x42

R15

- Infinitely variable electronic speed controller by potentiometer
- New design with cover
- ON/OFF light switch
- **Suitable for surface and built-in application**
- Ease of connection by the means of removable terminals
- External trimmer for the adjustment of the fan minimum speed
- Protection fuse
- Preset holes for surface and recessed cable entry
- Single-phase 230V – 50 Hz
- **Max. load 1,5 A**
- Protection IP42
- Weight 0,5 Kg
- Dimensions 138x80x42

RS

- **4 steps speed controller**
fitted with transformer
- New design with cover
- **Suitable for surface or built-in installation**
- Ease of connection by the means of removable terminals
- Running led On/Off
- Supply voltage 230V – 50/60 Hz
- Provided with protection fuse
- **Max. load: 0,37 A**
- Protection IPX2
- Weight 0,54 Kg
- Dimensions 138 x 80 x56

RVS

- **5 steps speed controller**
(fitted with transformer)
- ON/OFF switch
- IP42 protection
- **Max. load: 100 W (0,5 A)**
- Supply voltage: 230V-50/60 Hz
- Sizes: 118 x 118 x 58 mm
- Weight: 0,7 kg

RS/R 4 steps

- **4 steps reversible speed controller**
fitted with transformer
- **Suitable for reversible fans Vitro and Built-in**
- New design with cover
- Suitable for surface or built-in installation
- Ease of connection by the means of removable terminals
- Running led On/Off
- Supply voltage 230V – 50/60 Hz
- Provided with protection fuse
- **Max. load: 0,37 A**
- Protection IPX2
- Weight 0,54 Kg
- Dimensions 138 x 80 x56

**RVS/R 3 steps**

- **3 steps reversible speed controller**
(fitted with transformer)
- ON/OFF switch
- IP42 protection
- **Max. load: 0,5 A**
- Supply voltage: 230V-50/60 Hz
- Sizes: 118 x 118 x 58 mm
- Weight: 0,7 kg

RVS/R 5 steps

- **5 steps reversible speed controller**
(fitted with transformer)
- ON/OFF switch
- IP42 protection
- **Max. load: 0,5 A**
- Supply voltage: 230V-50/60 Hz
- Sizes: 118 x 118 x 58 mm
- Weight: 0,7 kg

**RVS1**

- **5 steps speed controller**
(fitted with transformer)
- ON/OFF switch
- IP55 protection
- **Max. load: 1,5 A**
- One-phase supply voltage: 230V-50 Hz
- Sizes: 166 x 142 x 66 mm
- Weight: 2,4 kg

RVS/R PLUS

- **5 steps reversible multi controller**
(fitted with transformer)
- Regulation up to 5 pcs of VITRO 9 or 3 pcs of VITRO 12 contemporaneous.
- ON/OFF switch
- IP42 protection
- **Max. load: 1,5 A**
- Supply voltage: 230V-50/60 Hz
- Sizes: 158 x 118 x 76 mm
- Weight: 1,8 kg

**RVS/RL**

- **5 steps speed controller to be used with POLAR ceiling fans**
(fitted with transformer)
- ON/OFF switch
- Light and reversibility
- **Max. load: 0,5 A**
- IP42 protection
- Sizes: 118 x 118 x 58 mm
- Weight: 0,7 kg

RLS 1 WR

- Remote control for EC versions of Aera, Aera in line, Ebox micro and Multibox.
- Manual selection of three modality of continuous running:
I - Low ventilation modality
II - Intermediate ventilation modality
III - Intensive ventilation modality
- Supply voltage 230V – 50/60 Hz
- Weight 0,50 Kg
- Dimensions 75 x 75 x 30

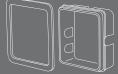

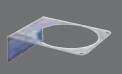

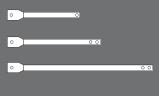

**RLS AC**

- Remote speed control (Min/Max) and On/Off switch for Aera (no EC version), Aera in line, Ebox micro and Multibox.
- New design with cover
- **Suitable for surface or built-in installation**
- Ease of connection by the means of removable terminals
- Protection IP42
- Weight 0,40 Kg
- Supply voltage 230V – 50/60 Hz
- Dimensions 110 x 80 x 42
