

NOW MEET THE PLUS SERIES TORCH AND HANDLE.

The CA 2460+ cutting attachment and WH 315FC+ welding handle are also newly available and vastly improved, thanks in large part to input from talented and insightful craftsmen who use our tools daily.

Advanced flashback arrestor – We challenged ourselves to design a torch that has the built-in features we love but none of those all-too-common flow restrictions, and that's what we delivered.

More communicative valves – Understanding that not everyone in the industry has the same level of comfort and familiarity with a torch, we added small labels – open/close, on/off, oxy/fuel – to help guide more-novice users.

Improved field reparability – The user-friendly design of the Plus Series allows for immediate replacement of the plunger and easy access to the mixer.

Glove-friendly knobs – Upgraded contouring makes for easier use with gloved hands.

Ergonomic handling – The curved lever can be triggered with the palm or the thumb and supports more-relaxed feathering.

Tougher where it counts – When we watched craftsmen work, we saw they use their torches as hammers and scrapers, so we reinforced the most-used areas with additional materials to increase longevity.

JOURNEYMAN OUTFIT.

The robust Journeyman outfit comes with everything you need to get started: CA 2460+ cutting attachment, WH 315FC+ welding handle, cutting tip, tip cleaner, heating nozzle, striker, goggles, hose, welding nozzles, and two EDGE 2.0 regulators.
