# Rexnord Quick Linq Series Chain

## The New Standard for Metal TableTop

In 1938 Rexnord developed the world's first Metal TableTop® Chain: the "815-Series", setting the standard for conveyor technology in bottle filling lines. The original way of connecting the chain lengths on a conveyor, using a hammer and a punch, has not changed, until now. Rexnord introduces the Quick Linq. A revolutionary design that reduces chain installation time from minutes to seconds.

### Improve Safety. Save Time. Reduce Cost.

Rexnord® Metal TableTop Chain equipped with the Quick Linq saves time and labor costs during installation and maintenance. At the same time safety is increased, since a hammer and a punch are no longer needed to connect the chains and noise levels are minimized.

### Engineered Sustainability by Rexnord

Rexnord Quick Linq is part of Engineered Sustainability™ by Rexnord, as it helps our customers to achieve sustainable goals, related to safety and productivity improvements.

Rexnord Quick Linq is available only for 3.25 inch (82.5 mm) and 3.30 inch (84 mm) chain types straight running and Magnetflex® in Rexnord X-Line Stainless Steel TableTop Chain quality.

60M 84XM Quick Linq Execution

**Safety**  
Chains can be connected in a safe and easy way without a hammer and a punch.

**Cost Savings**  
The chain lengths can be connected and opened in seconds instead of minutes, resulting in direct savings in labor costs for installation and maintenance.

**Durability**  
The metal spring allows numerous re-connections. It prevents the links from disconnection during operation.

**Performance**  
The easy way of connecting chain lengths prevents unwanted damage to other conveyor components that could affect conveyor performance.

**Identification**  
Quick Linq TableTop Chain is equipped with a unique feature for brand and chain type identification: an inscription on the loose hinge eye, visible from the top surface of the chain, even when installed in the conveyor.

**Visibility**  
The position of the Quick Linq in the conveyor is marked with a red dot for easy identification during maintenance.

**Strength**  
The Quick Linq offers the same maximum working load as the standard chain links, the load capabilities are not affected.

### How can Rexnord help you?

Please contact your local Rexnord representative for further information (Rexnord FlatTop Europe phone: +31 174 445 112 and Rexnord FlatTop North America phone: 1-262-376-4700).

Chain Type	Code Number	Plate Width	Weight	Surface Flatness	Polished Hinge Eyes	Working Load (max)
