Electromagnetic Compatibility (EMC) Directive, 2014/30/EU

Dynisco Instruments declares that the products:

PT199, PT199B, PT199S, APT199S, PT196, PT303

are not certified to comply with the essential electromagnetic compatibility requirements of the EMC Directive. However, per section 2.1 of the 2014 version of the European Commission Blue Guide;

Products already placed on the market before the Union harmonization legislation entered into force may be repaired or exchanged, as long as the original performance, purpose, or type isn't changed. The repaired or exchanged products need not undergo conformity assessment. The product may be exchanged for an entirely new identical product instead of being repaired.

The exchanged or repaired product must be installed in the same location as the original product. The original product may be retained by the customer so long as it is not installed in a new location.
