

# Sample Gas Filter

## AGF - PV - 30

Sample gas streams must be conditioned to provide particulate and moisture-free gas to the analyzer.

The AGF-PV-30 with the Bühler Unique QC bracket provides fine filtration and easy replacement of the filter media without the use of tools. This means the filter media can be changed in a matter of seconds.

The QC bracket rotates 180° making the mounting of the bracket of the filter independent from the flow direction chosen. This versatile mounting feature makes installation problem-free.

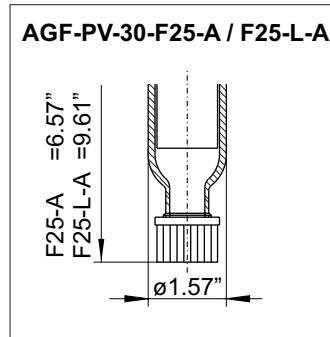

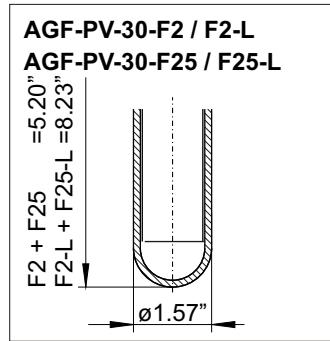

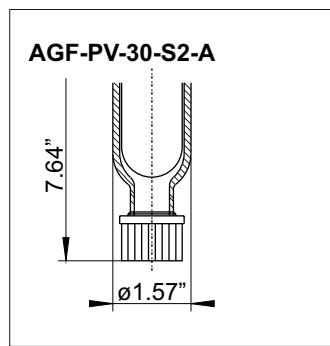

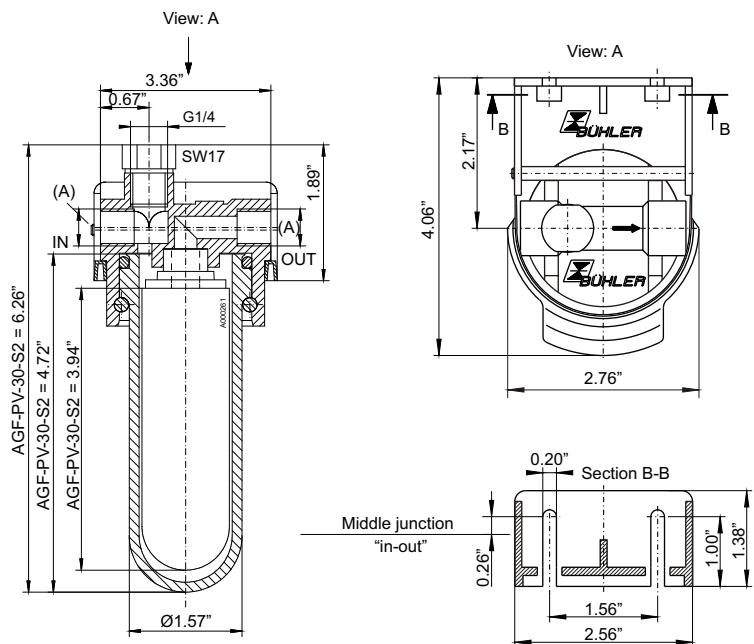

The filter head features an auxiliary port that can be used either for a bypass or for installation of a moisture detector.

A variety of filter media is available to meet any specific application requirement.

- **Bühler Unique - QC bracket**
- **Easy change of filter element without use of tools**
- **Low dead volume for fast response**
- **Versatile mounting bracket**
- **Condensate drain option**
- **Filter-head with additional port for bypass or moisture detector**

## Dimensions

## Technical Data

Filter head	PVDF	Temperature max.	212 °F
Filter bowl	Glas	Pressure max.	58 psig
Seal	Viton	Threads (A)	G1/4 or NPT 1/4 (see order information)

### Application in explosive atmosphere (additional cautions):

The equipment corresponds to the essential requirements of the European Directive 94/9/EC. Therefore it can be used in explosive atmosphere (**Zone 1 ; Group IIB**). Depending on the filter element used, inflammable gases and flammable gases (only temporary explosive in normal operation, **Zone 1; Group IIB or IIC**) can be introduced through this gas filters.

**Note indications of risk in the installation and operation instruction of the filter!**
