

Eurotherm

Temperature Control, Measurement and Data Recording Solutions

Product Selection guide

Eurotherm®

by Schneider Electric

Eurotherm

As part of the Schneider Electric business, Eurotherm is a leading global supplier of industrial and process control, measurement and data management solutions and services. Our innovative products and solutions are designed to bring real benefits to customers by optimising processes, operations and plant efficiency.

Our wide range of products is rich in features and designed for easy operation and reduced engineering time. They contain market-leading control algorithms, recording and data management strategies which add value to industrial processes, improving quality, reducing waste and ensuring data is kept safe for as long as it is needed.

Decades of experience in providing world-class process control, recording and automation are supported by a continuous research and development programme to ensure our solutions meet the modern challenges faced across a wide range of industries. Our customers are fully supported by a global sales and service network of highly qualified engineering personnel who understand the applications and industries they serve.

Eurotherm Products

PID Controllers, Indicator and Alarm Units

Improve process efficiency, product quality and minimise waste with our high accuracy controllers. These feature-rich instruments offer versatility in application and have clear, user friendly operator interfaces. Quickstart features, help text and PC graphical wiring ensure your engineering costs are minimised even with the most sophisticated of configurations.

Recorders & Data Management

Ensure your precious process data is kept safe with our range of state-of-the-art recorders and data management software. Along with some of the best, proven recording and archiving strategies, Eurotherm recorders offer a wealth of functions including batch, audit trail, electronic signatures and remote viewing/operation – ensuring operational efficiency is optimised and enabling you to convert data into the information required to add value to a process.

Solid State Relays (SSRs), Power Switches and Power Controllers

Improve process performance and save on energy costs with our formidable range of power products. Covering all types of load and voltage, these reliable products offer features such as high performance alarm strategies and advanced diagnostic load fault detection and are supported by our vast experience in all types of power control applications.

AC Drives, DC Drives and Starters

With a wide range of simple yet clever drives and soft starters, Eurotherm can support all manner of applications and industries. From simple applications to complex systems, the units offer accurate, dynamic performance with easy installation and operation.

Plastics Machine Control Systems

Our plastics machine control systems are designed to save plastics OEMs and producers time and money. A revolutionary building block architecture adapts to ever changing needs to ensure your system continues to offer you the best in productivity and flexibility.

Machine Control PAC

Eurotherm brings a wealth of expertise in process automation across many industries and offers high performance solutions designed to provide ongoing operational efficiency. Our solutions are fully scalable from the smallest HMI to a large, enterprise wide automation network and minimise initial engineering costs with consistent, flexible tool sets.

I/O Signal Conditioning, Probes, Thermosensors and Actuators

Our wide range of signal conditioning, sensing and actuation equipment is designed for you to get the best from your process with accurate, reliable performance. Competitively priced, these products offer quality solutions for a range of applications from furnace to atmosphere control systems. The complete range includes accessories and quality control products to ensure you get everything you need for a complete solution.

Service and Support

Our expert services will ensure your processes are supported, maintained and optimised. Our experienced engineers, supported by industry specialists across Eurotherm, will work with you to ensure you are getting the best from your processes. Latest online tools further help you to ensure easy, ongoing operational efficiency.

Service and Support (check region for availability)

Accredited Services (AMS2750, *ISO17025)

- Calibration: *Electrical, *Pressure, *Time,*Temperature and Humidity
- Thermal Uniformity Surveys: Ovens, Furnaces, Freezers, Chambers
- System Accuracy tests
- Thermal Imaging

Engineering Services

- Custom engineered solutions
- Custom design, configuration and implementation of bespoke systems

Repair and Support Services

- Repair option
Premium: 24Hr from receipt of module
Express: 3 working days from receipt of module when booked via www.eurotherm.co.uk/services
Standard: 5 Working days from receipt of module
- Upgrades, calibration, refurbished equipment for sale

Installation and Commissioning

- Complete installation and commissioning of discrete instrumentation to large DCS systems
- Loop tuning and optimisation

Validation Services (GAMP)

- Complete Validation to GAMP@5 Guidelines
- Services to produce documentation for validation include:
 - User Requirements, Functional Specification and Design Specifications
 - System Build
 - Installation, Operational and Performance qualifications
- Services to maintain the validated state including:
 - Calibration
 - Like for like parts management to minimise re-validation effort
 - Controlled installation of patches and upgrades
 - System operation and administration
 - Backup and disaster recovery solutions
 - Training for system operators and administrators

Technical Services

- Free telephone support via our dedicated help desk
- Extended Warranty
- Service Contracts
 - Breakdown: 24Hr cover 7 days a week with guaranteed response to site
 - Parts management, included bonded spares placed on site
 - Preventative maintenance and health checks
 - Remote Diagnostic Support
 - Disaster Recovery Backups and Recovery
 - Software and application support with escalation to R&D
 - Bespoke Service Level Assessments

Training

- Formal classroom based including bespoke courses
- Informal hands-on “question & answer” at customer's site
- Self paced training modules

eos

Eurotherm Online Services

Eurotherm Online Services (EOS) a trusted solution, for anywhere – anytime management and access to plant information.

Specifically designed for industry it combines storage, workflow, access, and visualisation of critical data in one place. Ideal for industries such as Aerospace, Automotive, Life Sciences, Health Care and Food & Beverage, the tools combine the in-depth knowledge Eurotherm has on managing data, technology and calibration services with our own dedicated offsite storage facility offering secure and efficient web access. EOS is completely scalable and relevant to small scale manufacturing and large, multi-site businesses.

EOS Director

EOS Director is a lot more than secure, access anywhere file storage. It is specifically designed for a plant, batch and time centric view of your process data. Historical process data can be searched, visualised and if necessary retrieved from this secure back up facility faster than ever before. It provides effective management of data generated by recording devices, in particular the secure, UHH files generated by Eurotherm products.

EOS Advisor

EOS Advisor is a unique, online solution for managing calibration and accreditation information and is the future for managing a plant's regulatory status. Calibration status of all your plant's equipment can be checked using a simple, intuitive web interface. Information such as calibration certificates can be quickly retrieved as and when required by authorised users. It enables you to easily maximise plant availability and ensure compliance with regulatory standards such as Nadcap, AMS2750 and CQI-9.

ecat.

Eurotherm Calibration Administration Tool

Eurotherm offers professional services supported by leading industry expertise and is recognised in the market place for its comprehensive, high quality, responsive offerings. In the same way we develop our products to deliver leading, innovative solutions, it makes sense that we develop our services in the same way.

eCAT is a unique new tool for service engineers carrying out on-site calibration. Combined with EOS (Eurotherm Online Services), it shows Eurotherm leading the way in driving best operational efficiencies for its customers. It revolutionises the calibration process, significantly increases its efficiency and reduces the risk of human error – ensuring production quality and plant accreditation status is maintained.

The new tool has been reviewed and approved by UKAS (United Kingdom Accreditation Service) and has received very positive feedback from them.

Calibration Services

eCAT replaces outdated paper systems and reduces the time taken to get calibration certificates. In combination with EOS, certificates are made available on the day of calibration.

- Unique, automated calibration tool
 - Validates data as it is entered
 - Reduces risk of human error
- Significantly higher efficiency for calibration services
 - Service engineer can publish calibration certificates on the day of calibration
