

# Hot Air Welders

## THE QUICK-SE HOT AIR TOOL

The versatile Quick-SE (Electronic) is a light, handy, tried and tested hot air welding tool.

Ergonomic Handle Design: A tapered handle for ease of handling and use.

### FEATURES OF THE QUICK-SE:

- Well balanced motor to prevent vibration
- Large air output— 300 l/min
- Broad line of easily installed nozzles that are compatible with similar tools
- Large air intake to keep tool cool
- Replace brushes from outside the tool — no need to disassemble
- Easily replaced power cord should it become damaged
- Generates its own air with built-in blower and motor
- Electronic variable temperature control up to 1290°F (700°C)
- 12-month warranty on parts and workmanship (excluding the element and brushes)
- Snug fitting ceramic element to prolong element life
- Overall light weight — 2 lbs, 10 oz
- Small handle for ease of use — ergonomically designed to make the job easier
